

# Omni Tech International, Ltd.

## FROM FIELD TO FUEL

*Providing a complete range  
of consulting services  
to the biodiesel industry.*

**OMNI TECH**®

## Biodiesel Industry Leadership

For the biodiesel industry, these are days of tremendous opportunity and promising growth, coupled with rapid change and risk. Like most biomass ventures, success is not dependent on one product alone, but on obtaining profitable returns from a combination of product and co-products. Omni Tech International, Ltd. can be there, offering strategic counsel and technical services to turn your biodiesel dreams into profitable reality.

Omni Tech International is the experienced consulting firm for companies seeking to bring biodiesel and other bio-based products to the world's rapidly expanding markets.

Omni Tech has the technical expertise and hands-on biodiesel industry experience to accurately assess the risk potential of your plans. By looking at the size and value of your potential markets and the risk and costs involved, we can help weigh your options before you invest capital in new facilities or assets.

What's more, our life cycle assessment approach can provide the analysis you need to determine the full scope and potential for your business venture. We streamline the analysis by circumscribing only the necessary variables for product or process comparison. This facilitates effective decision-making. With a life cycle assessment, years of effort can be cut to months and significant savings can result.

Omni Tech has a long standing relationship with the United Soybean Board and is an active member of the National Biodiesel Board. Chemical Marketing Reporter, a leading trade resource, named Omni Tech an "authority" on bio-based products because of our expertise and experience in the industry.

### Industry Leaders and Partners

Omni Tech consultants based around the world provide you with the inside track to promising opportunities and valuable networks. Omni Tech has amassed extensive working knowledge and expertise ranging from the securing of raw materials to the distribution of biodiesel in the fuel market and many services in between.

Our cross-functional management team and associates provide you with:

- In-depth opportunity analyses specific to this vast market

- More than 35 years of hands-on experience in the production of methyl esters and chemical processing
- Guidance in technology assessment and counsel, designing, building and operating biodiesel plants
- Preparation for quality and environmental management system certifications (ISO 9001:2000 and ISO 14001) including BQ-9000 requirements from the National Biodiesel Board
- Expertise in commercialization through certification and market launch.

We work with each client individually to clearly define project expectations and expertise requirements. Services are tailored to your needs ... and because we draw from the collective knowledge of over 200 associates, you can rely on counsel that is sound and effective.

### Our Knowledge at Your Fingertips

Omni Tech offers a broad range of resources that can be applied to your company, products and objectives. These include:

- Strategic business and market planning, implementation and facilitated problem solving

## Key Market Questions

Omni Tech is your source for answers to the myriad questions you have, no matter how well your venture is established. Typical client questions generally fall into the following categories:

### Raw Materials

- What is the short-term and long-term availability of soy oils and other triglycerides?
- What buying strategy will achieve the lowest cost and a sustainable supply?

### Manufacturing

- What plant design will help ensure product quality?
- How can I optimize my plant to maximize productivity and minimize waste?
- What options do I have for waste disposal?
- How will BQ-9000 and industry standardization help me?

### Supply Chain

- How can I achieve efficiency in rail and marine freight logistics?
- Where do I find pipeline access for blended biodiesel products?
- How do I gain access to domestic wholesale and retail markets, and foreign markets?
- What are the specific labeling requirements, tax laws and incentives in a state?
- What are the federal/state/local regulations and how are they likely to change?

Every company has unique questions. That's why we work with you to get answers that are designed to meet your organization's specific goals. Omni Tech's practical experience in raw material procurement, manufacturing and supply chain management allows us to oversee the entire process – helping you avoid or remove roadblocks so you can get your products to market.
